Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

1. This Office Action is in response to the Response to Restriction Requirement filed August 2, 2004. Claims 1-10 of Group I have been elected. In view of the Response, claims 11-18 of Group II will be rejoined with Group I when Group I is found allowable. Referring to claims 19-24 of Group III (an improvement in microfluidic system), it is noted that an improvement can be alternatively achieved by the surface chemical modification instead of exposure to light. Thus, Group II will not be rejoined with Group I even if Group I is found allowable.

Claim Objections

2. Claim 8 is objected to because of the following informalities: claim 8, line 3, change "or" to --and--.

Appropriate correction is required.

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless --

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

4. Claims 1 and 3-10 are rejected under 35 U.S.C. 102(b) as being anticipated by Locascio et al. [Journal of Chromatography A, **857**, 275-284 (1999)].

The present invention relates to a method to modify fluid flow in a channel, comprising

exposing a **portion** of the channel to
light at a fluence and wavelength
sufficient to alter the **surface charge** at the exposed portion of the channel

(summary of claim 1)

Locascio et al. disclose a method to modify a microfluid device by altering the surface charge of channel by laser ablation in air (first columns of pages 276 and 282). Locascio et al. further disclose that the substrate comprises polyacrylic, polystyrene, or polyester (column 2 of page 276). Thus, the present claims are anticipated by the disclosure of Locascio et al..

Conclusion

5. Claim 2 is objected to as being dependent upon a rejected base claim, but

Art Unit: 1713

would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

6. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Ling-Siu Choi whose telephone number is 571-272-1098. The examiner can normally be reached on Monday to Friday.

If attempt to reach the examiner by telephone are unsuccessful, the examiner's supervisor, David Wu, can be reach on 571-272-1114.
